

Schedule Document

Critical path: T1→T10→T4→T9→T7→T2→T6

Actions taken to keep the sprint on schedule:

- Completed parallel tasks that do not require dependencies
- Regularly scheduled standups to ensure group members are aware of tasks and stay productive
- Broke stories down into smaller subtasks to ensure manageable and realistic workloads

We finished some functionalities successfully, such as the filtering and custom search features and the viewing of details on listings, as well as finishing past tasks that were shifted over to Sprint 3. Despite this, there are some tasks that have yet to be completed due to some of the dependencies (seen in the Network Diagram) and unforeseen delays in the process, which will be completed in the next sprint.

Network Diagram for Sprint 3
